SCHEDULE K

Classification of Foreign Ports by Geographic Trade Area and Country: 1997

INTRODUCTION

This schedule lists the major ports of the world directly handling waterborne shipments in the foreign trade of the United States and the numeric codes identifying these ports in tabulations such as the TM/TA 380 and 780 (monthly/annual imports/exports by vessel). The ports are grouped according to the country arrangement in Schedule C, Classification of Country Designations for U.S. Foreign Trade Statistics, effective June 1, 1992. Note that the concordance between the Schedule C and the Schedule K is based upon the first three digits only; the last two digits identify the specific foreign port.

Within various countries and regional areas, groups of individual ports have been combined under single code numbers described as "all other ports." The ports listed in these basket categories represent smaller ports whose participation in the foreign trade to date has been of insufficient importance to warrant the compilation and presentation of separate data. For some countries, more than one of these basket categories have been listed to facilitate the segregation of traffic in terms of trade areas or trade routes.

In order to furnish further identification of ports in Canada and the Philippines, each of which contains a particularly large number of ports engaged in waterborne traffic with the United States, abbreviations have been inserted beside the port names to show the Canadian province or territory and, in the case of the Philippines, to show the island in which the designated ports are located. Small islands located off the shore of major islands in the Philippine Archipelago have been generally identified by the abbreviation for the larger islands. The abbreviations used are as follows:

		CANADA	
BC	British Columbia	ONT	Ontario
CBI	Cape Breton Island	PEI	Prince Edward Island
LAB	Labrador	QUE	Quebec
MAN	Manitoba	YT	Yukon Territory
NB	New Brunswick	X	High or Deep Sea (for fishing vessels)
NFLD	Newfoundland		
NS	Nova Scotia		
		PHILIPPINES	
BAS	Basilan	MIN	Mindanao
CEB	Cebu	NNC	Nonoc
JOL	Jolo	POL	Polillo
LEY	Leyte	POR	Poros
LUZ	Luzon	ROM	Romblon
MAS	Masbate		

HOW TO USE THIS SCHEDULE

This schedule consists of three parts: Part 1, Numeric Code Index, Part 2, Alphabetic Index, and Part 3, Country and Territory Index. Your goal is to select the port code which identifies the foreign port where the vessel cargo is directly unladen (export shipments from the United States) or the foreign port where the cargo was laden on the importing carrier (import shipments into the United States).

To ascertain whether the name pertains to a bonafide waterborne port or possibly could be the place for the ultimate destination for the cargo, refer to a world atlas. Obviously, if the name identifies an inland or landlocked city, then you need to verify the true port of vessel cargo lading or unloading.

For ease of reference, use Part 2, the alphabetical index at the back of this schedule, to locate the foreign port name. Note that for some port codes, not only may several spelling variants be listed, but also, subports or

geographically adjacent ports may be identified by the same foreign port code as well. Also, since there are numerous ports with the same name, ensure that you have selected the correct port code by verifying the country name.

If you cannot locate the foreign port name in Part 2, then use Part 3, Country and Territory index, to assist you in finding the correct page in Part 1, Numeric Code Index, containing the country name. In most cases, if

the foreign port name is not listed, then determine if the port in question is geographically close to a port already listed. If so, assign the same code.

If you have any questions concerning the validity of a foreign port name and its proper classification, please contact Foreign Trade Division, Transportation Branch, at 301-457-2317 or by facsimile on 301-457-1237 for assistance.
